CONTENTS

NUMBER 1

Editor's Foreword	i	
MINI REVIEW		
Transmembrane signalling in *Saccharomyces cerevisiae*	1	*D. Engelberg, R. Perlman and A. Levitzki*
GENERAL PAPERS		
Multiple defects occur in the guanine nucleotide regulatory protein system in liver plasma membranes of obese (fa/fa) but not lean (Fa/Fa) Zucker rats: loss of functional G_i and abnormal G_s function	9	*M. D. Houslay, D. J. Gawler, G. Milligan and A. Wilson*
GTP causes calcium release from a plant microsomal fraction	23	*E. Allan, A. Dawson, B. Drøbak and K. Roberts*
Characterization of a large conductance non-selective anion channel in B lymphocytes	31	*F. V. McCann, D. C. McCarthy, T. M. Keller and R. J. Noelle*
Attenuation of neurotoxicity following anoxia or glutamate receptor activation in EGF- and hippocampal extract-treated neuronal cultures	45	*P. J. Pauwels, H. P. van Assouw and J. E. Leysen*
Differential expression of the receptors for epidermal growth factor and insulin in the developing human placenta	55	*J. M. Tavaré and G. H. Holmes*
Foetal calf serum enhances cholera toxin-catalysed ADP-ribosylation of the pertussis toxin-sensitive guanine nucleotide binding protein, G_i2, rat glioma C6BU1 cells	65	*G. Milligan*
Calcium uptake-dependent and -independent mechanisms of inositol trisphosphate formation in adrenal chromaffin cells: comparative studies with high K^+, carbamylcholine and angiotensin II	75	*N. Sasakawa, T. Nakaki, S. Yamamoto and R. Kato*
Adenosine A1 receptors inhibit both adenylate cyclase activity and TRH-activated Ca^{2+} channels by a pertussis toxin-sensitive mechanism in GH_3 cells	85	*D. M. F. Cooper, K. K. Caldwell, C. L. Boyajian, D. W. Petcoff and W. Schlegel*
Phospholipid metabolism and T cell activation: receptor triggering is associated with the inhibition of phosphatidylserine synthesis	99	*C. Pelassy, C. Aussel and M. Fehlmann*
Ultrastructural localization of the GTP-binding protein G_o in neurons	107	*J. Gabrion, Ph. Brabet, B. N. T. Dao, V. Homburger, A. Dumuis, M. Sebben, B. Rouot and J. Bockaert*
Forthcoming papers	iii	

NUMBER 2

MINI REVIEWS		
Inositol phosphate metabolism: further problems and some solutions	125	*S. B. Shears*
Cross-talk between different receptor–effector systems in the mammalian CNS	135	*S. J. Hill and D. A. Kendall*

Insulin mediators revisited 143 *J. M. Mato*

General Papers

Development of a novel, $INS(1,4,5)P_3$-specific binding assay. Its use to determine the intracellular concentration of $INS(1,4,5)P_3$ in unstimulated and vasopressin-stimulated rat hepatocytes 147 *S. Palmer, K. T. Hughes, D. Y. Lee and M. J. O. Wakelam*

Protein phosphorylation and the dependence on Ca^{2+} and GTP-γ-S for exocytosis from permeabilised mast cells 157 *T. W. Howell, Ij. M. Kramer and B. D. Gomperts*

Phorbol ester inhibits polyphosphoinositide phosphodiesterase activity stimulated by either Ca^{2+}, fluoride or GTP analogue in HL60 membranes and in permeabilized HL60 cells 165 *B. Geny, J. Stutchfield and S. Cockcroft*

The β-adrenoceptor is precoupled to Gs in chicken erythrocyte membranes 173 *R. Murray and A. K. Keenan*

Benzylisoquinoline compounds inhibit the ability of calmodulin to activate cyclic nucleotide phosphodiesterase 181 *Z. Hu, S. Chen, Z. Hao, W. Huang and S. Peng*

Potassium as a signal for both proliferation and differentiation of rabbit retinal (Müller) glia growing in cell culture 187 *W. Reichelt, D. Dettmer, G. Brückner, P. Brust, W. Eberhardt and A. Reichenbach*

Antiphosphotyrosine antibodies modulate insulin receptor kinase activity and insulin action 195 *R. Ballotti, J.-C. Scimeca, A. Kowalski and E. Van Obberghen*

Forthcoming papers i

NUMBER 3

Mini Reviews

Serine phosphorylations triggered by the insulin receptor 205 *G. J. Sale and D. M. Smith*

Unmasking a growth factor/oncogene-activated S6 phosphorylation cascade 219 *S. C. Kozma, S. Ferrari and G. Thomas*

General Papers

Expression of a functional protein kinase C-γ using a baculovirus vector: purification and characterisation of a single protein kinase C iso-enzyme 227 *G. Patel and S. Stabel*

Homologous and heterologous desensitization mediated by vasopressin in smooth muscle cells 241 *P. Nambi, N. Aiyar, M. Whitman, C. E. Grier, III and S. T. Crooke*

Metabolism of inositol 1- and 4-monophosphates in HL60 promyelocytic leukaemia cells 253 *J. A. Creba, F. Carey, J. Frearson and A. McCulloch*

Diffusion into the patch-clamp recording pipette of a factor necessary for muscarinic current response 259 *A. Marty and J. Zimmerberg*

Purification of a serum factor which reverses dibutyryl cAMP induced differentiation 269 *P. W. Grabham, R. J. A. Grand and P. H. Gallimore*

Inhibition of PI-kinase in rat liver membranes by F^- 283 *M. Biffen and B. R. Martin*

A chymotryptic-type protease inhibitor decreases interleukin 2 synthesis and induces prostaglandin production in Jurkat T cells 289 *P. Auberger, M. Didier, J. Didier, C. Aussel and M. Fehlmann*

Effects of adrenalectomy on CRH regulation of ACTH release: adenylate cyclase activity, cyclic AMP-dependent protein kinase activity and ACTH release — 295 *G. S. Dhillon, M. A. Oleshansky and G. J. Kant*

Forthcoming papers — i

NUMBER 4

MINI REVIEW

Regulation of protein kinases by pseudosubstrate prototopes — 303 *B. E. Kemp, R. B. Pearson, C. House, P. J. Robinson and A. R. Means*

GENERAL PAPERS

Activation of human T cells is associated with tyrosine phosphorylation of several cellular proteins — 313 *J.-F. Peyron, B. Ferrua and M. Fehlmann*

The control of cytoskeletal actin and exocytosis in intact and permeabilized adrenal chromaffin cells: role of calcium and protein kinase C — 323 *R. D. Burgoyne, A. Morgan and A. J. O'Sullivan*

Bradykinin-induced changes in phosphoinositides, inositol phosphate production and intracellular free calcium in cultured bovine aortic endothelial cells — 335 *D. E. Myers and R. G. Larkins*

Lipopolysaccharide, muramyl dipeptide and polyinosinic:polycytidylic acid induce the accumulation of inositol phosphates in blood monocytes and lymphocytes — 345 *W. Kozak, A. S. Milton, H. Abul, J. Davidson and D. Rotondo*

Dissociation between adenosine receptors and adenylate cyclase in the smooth muscle of guinea pig myometrium — 357 *M. A. Smith, J. L. Silverstein, D. P. Westfall and I. L. O. Buxton*

Synergistic induction of interleukin 2 receptor (Tac) expression on YT cells by interleukin 1 or tumor necrosis factor α in combination with cAMP inducing agents — 367 *W. Scholz and A. Altman*

Inhibitory actions of somatostatin on cyclic AMP and aldosterone production in agonist-stimulated adrenal glomerulosa cells — 377 *W. P. Hausdorff, G. Aguilera and K. J. Catt*

***Staphylococcus aureus* α-toxin activates phospholipases and induces a Ca^{2+} influx in PC12 cells** — 387 *D. Fink, M. L. Contreras, P. I. Lelkes and P. Lazarovici*

Lipid signalling pathways in normal and *ras*-transfected NIH/3T3 cells — 395 *G. R. Matyas and P. H. Fishman*

Activation of human neutrophil protein kinase C *in vitro* by 1,2-isopropylidene-3-decanoyl-*sn*-glycerol ($IpOCOC_9$) — 405 *H. Olsson and H. Bergstrand*

Forthcoming papers — i

NUMBER 5

MINI REVIEW

Tissue distribution and subcellular location of guanine nucleotide binding proteins:—implications for cellular signalling 411 *G. Milligan*

GENERAL PAPERS

ADP-ribosylation of thylakoid membrane polypeptides by cholera toxin is correlated with inhibition of thylakoid GTPase activity and protein phosphorylation 421 *P. A. Millner and P. S. Robinson*

Vasoactive intestinal peptide receptor regulation of cAMP accumulation and glycogen hydrolysis in the human Ewing's sarcoma cell line WE-68 435 *F. van Valen, H. Jürgens, W. Winkelmann and E. Keck*

The effect of recombinant interleukin 4 upon protein kinase activities associated with murine and human B lymphocyte plasma membranes 447 *G. M. McGarvie and W. Cushley*

Cholinergic-induced [^{3}H] noradrenaline release in rat brain cortical slices is mediated via a pertussis toxin sensitive GTP binding protein and involves activation of protein kinase C 461 *I. L. Ari, L. Schwarz and D. Atlas*

Protein kinase C is not involved in secretion by permeabilized human neutrophils 471 *J. E. Smolen, S. J. Stoehr and D. Bartone*

Epinephrine potentiates calcium mobilization and activation of protein kinases in platelets stimulated by ADP through a mechanism unrelated to phospholipase C 483 *C. Olbrich, M. Aepfelbacher and W. Siess*

G-protein dependent potentiation of calcium release from sarcoplasmic reticulum of skeletal muscle 493 *M. Villaz, M. Robert, L. Carrier, T. Beeler, B Rouot, M. Toutant and Y. Dupont*

Fibroblast growth factor potentiates receptor- and nonreceptor-mediated stimulation of adenylate cyclase in hamster fibroblasts 507 *I. Magnaldo, J. Pouyssegur and S. Paris*

Protein kinase C-mediated phosphorylation of retinal rod outer segment membrane proteins 519 *R. Sagi-Eisenberg, L. M. Traub, A. M Spiegel and Y. Zick*

Forthcoming papers i

NUMBER 6

MINI REVIEW

Regulation of epithelial sodium channel densities by vasopressin signalling 533 *W. J. Els and S. I. Helman*

GENERAL PAPERS

Properties of membranous phospholipase C from WRK_1 cell: sensitivity to guanyl-nucleotides and bacterial toxins 541 *G. Guillon, B. Mouillac, R. Berrada, M. N. Balestre and C. Lombard*

Immunochemical comparison of pertussis toxin substrates in brain and peripheral tissues 553 *Y. Kanaho, T. Katada, K. Hoyle, S. T. Crooke and J. M. Stadel*

Biphasic effect of sodium fluoride and guanyl nucleotides on binding to prostaglandin E_2 receptors in rat epididymal adipocyte membranes 561 *R. Cohen-Luria, L. Sigler and G. Rimon*

Mechanism of the activation of arachidonic acid release by oxysterols in NRK 49F cells: role of calcium 569 *Z. Lahoua, M. E. Astruc, J. N. Barjon, F. Michel and A. Crastes de Paulet*

Rapid intracellular alkalinization of *Saccharomyces cerevisiae* MATa cells in response to α-factor requires the CDC25 gene product 577 *R. Perlman, Y. Eilam, E. Padan, G. Simchen and A. Levitzki*

Bradykinin effects on phospholipid metabolism and its relation to arachidonic acid turnover in neuroblastoma × glioma hybrid cells (NG 108–15) 587 *P. Simonsson, G. Y. Sun, S. Aradottir and C. Alling*

Factors involved in the generation of tension during contraction to high potassium in the rat vas deferens 599 *M. A. Khoyi, M. A. Smith, I. L. O. Buxton and D. P. Westfall*

Role of cell calcium in alpha-1 adrenergic receptor control of arachidonic acid release from brown adipocytes 607 *R. J. Schimmel*

Activation of protein kinase C sensitizes the cyclic AMP signalling system of T51B rat liver cells 617 *L. H. Aasheim, L. P. Kleine and D. J. Franks*

Forthcoming papers i
